

AN EMAILING SYSTEM WITH VAST CAPABILITIES

EASY MAIL

The OneTec system is capable of sending up to 10,000 emails to unique recipients. It offers you the possibility to communicate with your customers quickly and easily.

**LARGE SCALE
CAMPAIGNS**

DELIVERY REPORTS

**100% BESPOKE
SOLUTIONS**

**SCHEDULED EMAIL
CAMPAIGNS**

With EasyMAIL, our expert team of developers will create a custom email template in line with your branding enabling you to manage the content of each email campaign. Your communications are then sent to the contacts in your database from a dedicated white list server, ensuring your important communications never end up in SPAM folders.

The system scrupulously respects the Belgian law in terms of mass emailing and privacy and an unsubscribe button is included on each mailing.

Since you manage the content of the emails, they can include pictures, hyperlinks, logos and plain text. They will be sent from a dedicated email address associated with your event and you will be notified of any undelivered emails in real-time. You can even schedule your campaigns in advance to be sent at a specified date and time.
